Managing asthma in school: A guide for parents | Children ...

A – Administer medications at school when needed by ensuring the school nurse has an Asthma Action Plan (AAP) and school albuterol. Many kids have an asthma diagnosis but are missing any combination of an inhaler, spacer or AAP. M – Manage your child’s asthma with your provider every 3 months to assess control and need for daily controller medications. Make sure your child has their quick relief inhaler at school

Helping Students Manage Asthma at School | AAFA.org

This plan has information and instructions on how to manage your asthma. Asthma Action Plans tell school staff and other caregivers about your child’s asthma. You can give it to teachers, school nurses and after-school care staff. Medicine Bags Keep your child’s asthma medicines organized and easy to carry with AAFA medicine bags.

ERIC

The guide concludes with a set of resource information on asthma, including a list of early signs of an asthma episode, a sample asthma action plan, information on the use of a metered dose inhaler and a peak flow meter, and a list of resources available to schools to help manage asthma.
